

AWS Gameday 2024: Chaotic Commencement, powered by LSEG

Are you ready to power up your DevOps skills and test your problem-solving abilities by solving challenges in the AWS world?

If the answer is yes, join us on **Friday, 12 April** at the LSEG office (6G, Iuliu Maniu Bd) for an electrifying **AWS Gameday: Chaotic Commencement, powered by LSEG**.

Dive into a day of fun challenges, designed for 'on-the-job' learning. AWS and LSEG teams will be available throughout the day to assist and help answer any questions you have.

[Register now](#) and let the game begin!

What's your special mission?

We are the largest provider of mythical creatures in the world, and we are seeking elite talent to take the AWS business to the next level since our former DevOps team left to pursue a digital currency venture. We need the cream of the crop to come in and fix all the problems our former teams caused. We need YOU!

What to expect during the event?

The event will start with a video briefing on how the current solution works, and how success will be measured. After the briefing, your team will be given access to an AWS account with an initial legacy architecture setup. You will work together throughout the day to make your architecture as secure, performant, and resilient as possible, in the face of chaos events which threaten to bring down your systems!

How will the AWS GameDay look like?

- 09:00 AM – Welcome
- 09:30 AM – GameDay Presentation
- **10:00 AM – Game Starts**
- 12:30 PM – Halfway Mark
- **15:00 PM – Game Ends**
- 15:15 PM – Award Ceremony
- 15:30 PM – Event Concludes

How can you register?

Team up with 3-5 colleagues and register [here](#) by 31 March to delve into the world of AWS and enhance your DevOps skills. If you're part of a team, only one member needs to register for the entire group. Don't have a team? Worry not! We'll assign you to a team prior to the event.

This is an in-person initiative, so please ensure your availability on 12 April and bring your laptop along.

After registering, you'll receive further details and instructions for the day. We kindly request the group representative to disseminate all received information to the team.

Are there any pre-requirements?

It is not strictly required, but it will be beneficial if you have access to an environment and tools that will allow you to SSH into virtual machines, build Docker containers, and / or download, execute, and inspect Linux ELF binaries.

Pre-existing knowledge of services like Amazon CloudFront, Amazon EC2, AWS VPCs, Amazon ECS, AWS Lambda, and Amazon CloudWatch could also be beneficial, but not mandatory.

Is there anything you need to do beforehand?

- You will need to join a virtual AWS Pre-GameDay Immersion Day on 9 April (apx 3 hours) to learn more about the Game Day. We will send an agenda after you register with all the necessary links.
- Have a laptop/desktop for the Game Day
- Access to a web browser

Any questions?

Please get in touch if you have any questions at aws-lseg-gameday@amazon.com.
